1. GILBERT ADUNYA -gilbert@gilfield.co.ke
2. STEVEN MAWEU -stevenmaweu@gmail.com

Gilfield Services Ltd is a limited liability company duly organized and registered under the laws of the republic of Kenya. Having based ourselves on the features demanded by these industries, we have created innovative and cost friendly solutions available to all our customers in various sectors such as the Media industry, financial services, insurance, information technology, manufacturing and government ministries.

Our keen knowledge of air conditioning, refrigeration, Building Works and office technologies has helped us develop solutions that answer the needs of all clients while ensuring compliance with the relevant regulatory requirements. We have broadened our services in line with the new devolved government to offer our services to the County level. We have also established offices in Mombasa and Kisumu Counties and have short term plans to venture to other major counties in Western, central, Rift valley and Eastern regions.

We have multi talented technical team with expertise in various fields and are also highly disciplined and motivated to undertake the said assignments in almost any region within East African community.

Our unique ability to provide these services and our successful track record make us an enviable partner in these fields. We always strive to provide excellent service to all our clients and we are committed to giving you the kind of service you need and expect. Our rates are both very competitive and reasonable.

Thank you for the interest you have shown in our company.

Our MISSION

Committed to provide quality services at competitive rates in timely manner while observing governing laws

Customer care

We believe in building value adding relationship with our customers in the following ways:

Understanding our clients business and future plans. Continually monitoring our supply, installation and maintenance. Being in constant touch with our customers

STAND BY GENERATORS

GILFIELD SERVICES LTD

 Perkins

10 - 22 kVA
 33-112 kVA
 150 - 220 kVA
 400 - 550 kVA
 825 - 1125 kVA
 1375 - 1850 kVA
 2028 - 2500 kVA

GENSET SAFETY

- High water temperature
- Low oil pressure
- High & low engine speed
- Low radiator water level
- Over current load
- High & low genset voltage
- Start/stop failure

EXTRA EQUIPMENTS

- Charge ammeter
- Moulded case circuit breaker (in automatic models)
- Hospital (critical) type silencer
- Sound-proof canopy
- Mobile - trailer
- Synchronization control panel for 2-6 gensets.
- 4 pole automatic transfer panel (A.T.S.)
- Fuel and oil heater
- Alternator heater
- Automatic fuel filling system
- Fuel-water separator filter

 DEUTZ

40 - 60 kVA
 70 - 110 kVA
 130 - 150 kVA
 167 - 235 kVA
 400 - 460 kVA
 525 - 575 kVA
 615 - 825 kVA

-  Easy Assembling Base Frame with screw & nuts
-  Refilling from out of canopy
-  Canopy made of galvanized steel
-  Warning system for decreasing fuel with electronic fuel level sender

Powerware

Series 3 Single Conversion

Basic solutions to protect non-critical hardware and data against three of the nine power problems. Typical Installations are stand alone; PC's, telefax, home equipment etc

Series 5 Line Interactive

Higher protection level against 5 types of power problems. Intermediate solutions for office environment and servers, Typical applications include PC/small servers, network equipment, small storage equipment etc

Series 9 Double Conversion

Full power protection against 9 types of power problems Typical applications includes Critical 24x7 servers, other critical IT applications etc

ONLINE

OFFLINE

Offline UPS

Capacity 600VA/360W to 2000VA/1200W
 Input Voltage: 220/230/240VAC
 Output Voltage: 220/230/240VAC
 Transfer Time Typical: 2-4 Minutes
 Indicators LED and Audible Alarm
 Interface Smart RS-232 or USB
 Supports Windows 7, Novell & Linux

Online UPS

Capacity 1000VA/700W to 10000VA/7000W
 Input Voltage: 110-300VAC
 Output Voltage: 220VAC/230VAC/240VAC
 Efficiency To AC Mode: 85%, to Battery Mode: 83%
 Transfer Time AC to DC: Zero, Inverter to Bypass: 2.5min
 Indicators LED and Audible Alarm

Single Phase UPS

Line-Interactive and Off-Line UPS Systems have a very real role to play in the Power Supply market, offering low cost, data connectivity and often with AVR(Automatic Voltage Regulation) for a regulated output. The technology of the B60 and B200 is better suited to market sectors where an On-Line UPS might be considered overkill, this would include work stations and standalone Pc's, electronic tills, electric doors, CCTV, access control, ticket machines and other similar applications. Online Double Conversion. An Uninterruptible power supply System using true online double conversion technology provides the highest level of power protection available. The Borri B400 - a new range of compact and reliable UPS featuring On-line Double Conversion technology.

ELECTRICAL SERVICES

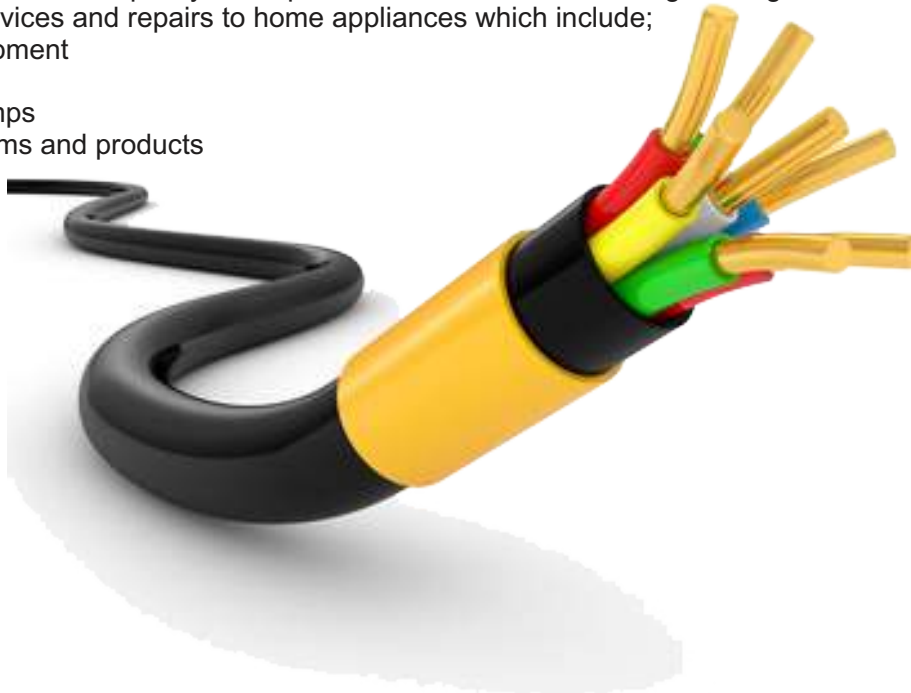

We provide Residential and commercial Electrical installations. Wiring Design and Platforms, installation of generators and UPS. Lighting materials and Accessories. Systems control wiring and installation of distribution panels.
